

Heated Magnetic Stirrer, IDL

Magnetic stirrer with heating plate

With a highly resistant, ceramic coated heating plate for exceptional chemical resistance, especially against acids and alkalies. The robust aluminium die cast housing is ideal for daily laboratory use.

Heavy-duty, electronically controlled motor can be used for both short and long-term tests.

Technical data

External (W × D × H):	205 × 260 × 110 mm
Stirring and heating plate:	190 × 190 mm (stainless steel with ceramic coating)
Stirring capacity:	max. 10 liters
Temperature range:	5°C over RT to 420°C
Heating power:	500 W
Speed range:	60 to 1500 min ⁻¹
Power supply:	230 V, 50/60 Hz

Article	Order No.
Magnetic stirrer	51 00 01003
